Java Question And Answer

Short answer. `Date input = new Date(); LocalDate date = input.toInstant().atZone(ZoneId.systemDefault()).toLocalDate();`
Explanation. Despite its name, `java.util.Date` represents an instant on the time-line, not a "date". The actual data stored within the object is a long count of milliseconds since 1970-01-01T00:00Z (midnight at the start of 1970 GMT/UTC).

datetime - Convert java.util.Date to java.time.LocalDate

...

This answers the question of how to read a file, but not the question of how to convert an object of type `java.io.File` to

File to byte[] in Java - Stack Overflow

Set, List and Map are three important interfaces of the Java collection framework, and the difference between Set, List, and Map in Java is one of the most frequently asked Java Collection interview questions. Sometimes this question is asked as When to use List, Set and Map in Java. Clearly, the interviewer is looking to know that whether you are familiar with the fundamentals of the Java ...
